

Microsoft Finance and Operations Core

Kód kurzu: MOC MB-300

This course discusses core components of Microsoft Dynamics 365 for Finance and Operations including how to configure core components of Microsoft Dynamics 365 for Finance and Operations and data migration and go-live preparation.

Audience Profile

A Dynamics 365 for Finance and Operations Functional Consultant is responsible for performing discovery, capturing requirements, engaging subject matter experts and stakeholders, translating requirements, and configuring the solution and applications. The Functional Consultant implements a solution using out of the box capabilities, codeless extensibility, application and service integrations.

Required skills

Before attending this course, students must have:

- General knowledge of Microsoft Windows
- The ability to use Dynamics 365 for Finance and Operations for basic processing
- General knowledge of basic mobile device features and navigation

Course outline

Module 1: Use common functionality and implementation tools

In this module, you will learn how to:

- Use common functionality and implementation tools.
- Describe use cases for, and capabilities of, workspaces.
- Use and personalize operational workspaces.
- Describe case management.
- Describe global address book features and their use cases.
- Identify the inquiry and report types available in a default installation.
- Describe use cases for the business document management and electronic reporting features.
- Work with business document management.
- Navigate and efficiently use search filtering and create search queries.
- Understand and use record templates.
- Describe use cases for Power Platform apps and services.
- Identify when to use Power Platform in the Dynamics 365 Finance app.
- Integrate Power BI with Dynamics 365 Finance apps.

Lessons

- Introduction
- Identify and use common Dynamics 365 Finance and Operations apps features and functionality
- Describe use cases for Power Platform apps and services
- Module Summary
- Module 2: Configure security, processes, and options
- In this module, you will learn how to:
- Distinguish between roles, duties, privileges, and permissions.
- Apply security roles to users.
- Describe segregation of duties.
- Run and analyze security reports.
- Create and use workflow for approval.
- Configure workflow properties and elements.

Microsoft Finance and Operations Core

- Set up and configure legal entities and operating units.
- Configure and troubleshoot number sequences.
- Create an organization hierarchy and assign purpose.
- Describe and apply user options.
- Configure document handling for attachments.
- Configure print management and form setup features.
- Describe use cases for the Microsoft Excel Workbook Designer and the Microsoft Dynamics Office add-in.
- Configure email (SMTP/Exchange).
- Create and maintain email templates.
- Use the personalization feature.
- Set up and monitor batch jobs and alerts.
- Introduction
- Implement security
- Design and create workflows
- Configure Organization administration features
- Configure System administration features
- Module Summary

Module 3: Manage Dynamics 365 Finance and Operation data

In this module, you will learn how to:

- Manage data in Dynamics 365 Finance and Operations apps.
- Describe Data management concepts.
- Understand the Data management workspace overview.
- Work with templates in the Data management workspace.
- Prepare data for import or create all necessary startup data including postal code data, customers, vendors, and products.
- Describe use cases for and types of data entities.
- Export data from a legal entity.
- Import data into a legal entity.
- Copy configuration data between companies or legal entities by using the data management framework.
- Describe use cases for the dual-write feature.
- Plan a migration strategy.
- Identify common migration scenarios and tools in Dynamics 365 Finance and Operations apps.
- Determine the scope for a migration.
- Identify relevant data entities and elements based on given scenarios.
- Establish migration strategy processes including migration scope.
- Prepare data for migration and migrate data.
- Create a checklist for proper planning for a given scenario prior to data migration.
- Identify and extract source data.
- Identify available data types for creating source data on a given scenario for data migration.
- Generate field mapping between source and target data structures.
- Import or export data by using the data management framework.
- Support the transition between the existing and migrated systems.
- Perform a test migration and validate output from the process.
- Implement data task automation.

Lessons

- Introduction
- Manage data in Dynamics 365 Finance and Operations apps

Microsoft Finance and Operations Core

- Plan a migration strategy
- Prepare data for migration and migrate data
- Module Summary

Module 4: Validate and support the solution

In this module, you will learn how to:

- Describe the correlation between test cases and business requirements.
- Use best practices for recording test cases.
- Use Task recorder.
- Create a scenario for acceptance testing and save in a Business process modeler (BPM) library.
- Sync and configure your test plan in Azure DevOps.
- Execute your tests.
- Use Regression suite automation tool (RSAT).
- Create user acceptance tests (UAT) and test plans.
- Create and work with BPM.
- Use Issue search.

Lessons

- Introduction
- Test solutions in Dynamics 365 Finance and Operations apps
- Implement Lifecycle Services tools
- Module Summary
